CTC Design's Role

Commissioning

HVAC & Process System Description

This is a 300,000 SF building with 75% manufacturing and 25% office space. Some systems this building has are: 270,000 CFM makeup air handlers with 35 zone air handlers, 5,000 Ton chiller plant and a boiler plant with several different exhaust and process systems.

Team Leader Comment

This project is a great accomplishment for CTC Design as it offered us with feedback and lesson learned on our Cx activities and process for such size project. It also enhanced our technical tool box as engineers from both the design and optimization aspect.
